Riad Mahmud Chowdhury

riadc916@gmail.com github.com/riadc916

OBJECTIVE

My goal is to build my knowledge and skills in Data Science and Machine Learning through working with different types of data, including data cleaning, sampling, analysis, visualization, and model training. I aim to use these skills to explore data-driven solutions to real-world problems and pursue research in these fields. I am also interested in finding ways to make data processing and machine learning more energy-efficient and reduce their environmental impact.

EDUCATION & ACADEMIC BACKGROUND

Bachelor of Science (B.Sc.) in Computer Science and Technology 2023 – Present (Expected Graduation: 2027)

Nantong University, China | Artificial Intelligence and Computer Science College

- Current Status: Completed 6th Semester (3rd Year)
- Academic Performance: CGPA: 4.0 / 4.0 (Completed 144 Credits)

Higher Secondary Certificate (HSC) 2018 – 2020

Chattogram Bandar College, Bangladesh

- Group: Science
- Result: GPA: 4.87 / 5.00

Mandarin

- Result: 220 / 300

RESEARCH INTERESTS

- Machine Learning (ML) & Deep Learning
- Natural Language Processing (NLP)
- Data Science and Data Analytics
- Cybersecurity
- Energy-Efficient Machine Learning and Sustainable Computing

PUBLICATIONS

Forthcoming Publications:

1. Provable Moving-Target Defense for Cyber-Physical Networks: From the Security-Performance Frontier to No-Regret Defense. Proceedings of the IEEE International Conference on Computer Science and Data Engineering (IEEE CSDE 2026). (Accepted)

RESEARCH EXPERIENCE

Research Contributor (Data Analysis) IEEE CSDE 2026

- Assisted extensively in the experimental analysis and framework evaluation of the research project.
- Contributed to the research manuscript preparation and formatting for the final submission package.
- Collaborated with cross-institutional authors to validate data outcomes and model performance.

PROJECTS

Data Analyst & Developer | GitHub Showcase

- **lego-data-analysis**: Developed an end-to-end data analysis workflow using Jupyter Notebook to process and extract structural insights from complex Lego datasets.
- **StackOverflow-Language-Trends**: Built a data visualization pipeline using Python, Pandas, and Matplotlib to analyze multi-year programming language popularity and community developer trends.
- **college-salaries-analysis-pandas**: Implemented data-driven models using Python and Pandas within Jupyter Notebook to evaluate post-graduation salary demographics across institutions.
- **Superstore-Sales-Profitability-Analysis**: Designed an exploratory data analysis framework using R (Tidyverse & Ggplot2) to clean, transform, and map corporate retail sales and profitability metrics.

SKILLS

• **Technical Skills:** Data Analysis, Data Visualization, SQL

• **Programming Languages:** Python (Pandas), R (Tidyverse), Java

• **Tools & Platforms:** VS Code, Google Colab, GitHub, LaTeX, Zotero, RStudio

• **Soft Skills:** Communication, Critical Thinking, Team Leadership, Project Handling

• **Languages:** Bengali (Native), English (Fluent), Mandarin (Basic)

AWARDS & CERTIFICATIONS

- **Data, Data, Everywhere** – Coursera (Google Data Analytics) | 2026
  Credential: Certificate Verification Link
- **100 Days of Code: The Complete Python Pro Bootcamp** – Udemy | 2026
  Credential: Certificate Verification Link
